EDUCATION

London School of Economics & Political Science

London, UK

MSc Applied Social Data Science (Distinction)

September 2024-25

Courses: Computer Programming, Data Visualisation, Machine Learning, Social Network Analysis, Causal Inference

Dissertation: Causal effects of Health & Social Care Visa Restrictions on the UK Adult Social Care Labour Market

Extracurriculars: LSE Congress on UN Sustainability, E-Waste Hackathon, HM Treasury Hackathon

Birkbeck College, University of London

London, UK

MRes Social Research & Psychosocial Studies (Distinction)

September 2020-21

Courses: Quantitative & Qualitative Social Research Methods, Lacanian Psychoanalysis, Education Globalisation & Change, Psychoanalysis & Culture

Dissertation: Queer & Caste Intersectionality in Indian Marriages: Evidence of Savarna Privilege

WORK EXPERIENCE

Care Policy & Evaluation Center, LSE

London, UK

Data Scientist

March 2025 – November 2025

- Developed an open-source R package. Implemented GitHub Actions workflows to automate daily data retrieval, publishing up-to-date UK care sector compliance and service provision datasets to a data repository.
- Architected a data integration framework of 30+ geospatial health and social care time series datasets across multiple formats (JSON, Excel, CSV) to enable population level analyses. Resulting co-authorship of peer-reviewed publications on index development for healthcare accessibility and service delivery patterns.
- Engineered a data infrastructure, leveraging REST API integration and HTML parsing, and implementing automated ETL pipelines to ensure data reproducibility.
- Leading the development and evaluation of the use of LLMs for early safeguarding detection, conducting feasibility studies with stakeholders and developing Graph RAG-based architectures to identify risks in unstructured free-text data.

CLIA Care Ltd.

London, UK

Service Coordinator

January 2022 – July 2024

- Coordinated support services & facilitated communication between residents with ASD, MH, & LD, their families, & staff teams across 7 supported living homes.
- Led a cross-functional team of 30, orchestrating a data driven service enhancement strategy using Power BI, that resulted in a 36% increase in satisfaction among service users & families.
- Collaborated with the NHS, private healthcare teams, social workers, & London borough commissioners to ensure care quality aligned with CQC regulations & safeguarding policies.
- Designed & implemented data driven interventions for challenging behaviours in service users with Autism, achieving a 25% improvement in adaptive behaviour skills through personal care plans.
- Utilised Excel to record & analyse data, increasing the acceptance rate of financial funding requests submitted to commissioners.

FLAME University

Pune, India

Research Assistant

May 2020 – July 2020

- Conducted a systematic literature review on Machine Learning systems on Google Smart Reply & their effects on human communication trends among middle-class Indians.
- Developed surveys & analysed responses of 120+ participants using SPSS to profile usage metrics & examine dependency on Google's AI for generating Smart Replies.

RESEARCH EXPERIENCE

- Co-authoring manuscript examining the causal impact of India's DPEP expansion on child health outcomes.
- Paper titled "*qcqpack: An R Package for Automated Access to Care Quality Commission Data*" is pending publication at Journal of Open Source Software.
- Authored and presented a paper on "*Effective Activism or Slacktivism: Digital Activism & Pro-Environmental Behaviour*" at the National Academy of Psychology conference at Pondicherry University in 2019.
- Designed, collected, & analysed data for a paper on "*Human Communication in the Context of AI-Based Messaging: Algorithm for a Global Language?*" Paper was presented at ICP, 2021.
- Collaborated with Sabah Siddiqui on the proposal for "*The super-diversity of Muslims in Britain: Traditional Islamic Medicine in Manchester as a community asset & health resource*".

SKILLS

Skills: Python, SQL, R, Stata, SPSS, Excel, NVivo, Causal Inference, Power BI, Adobe Photoshop
